

## Practical2: Creating account, repository on Github and Cloning repository in Github

### a) Creating Account

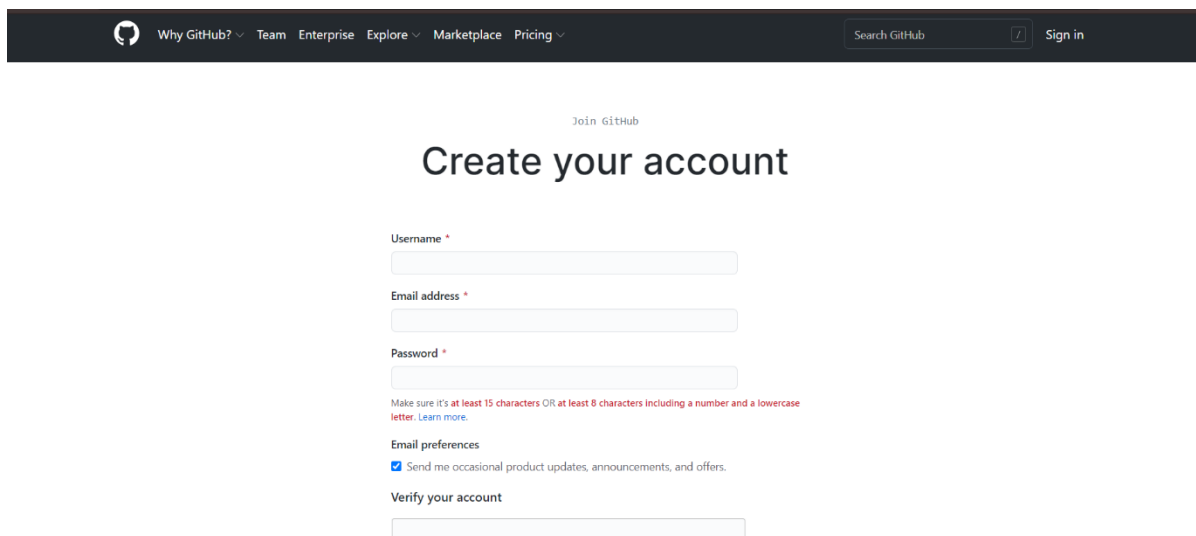

Go to <https://github.com/>

Then click on Sign up

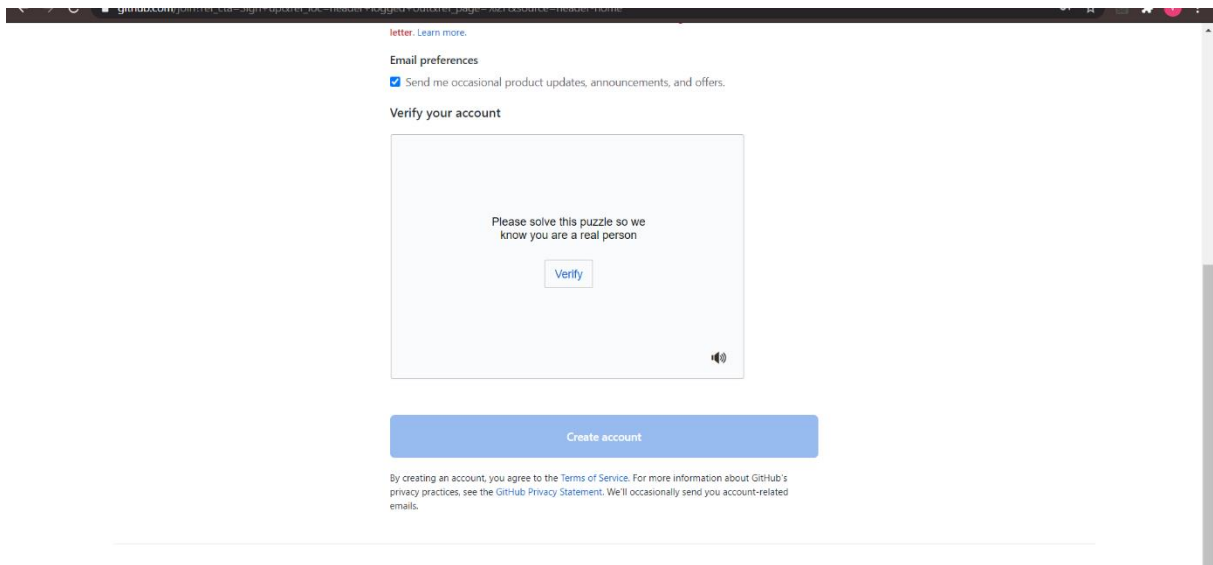

Fill up your detail ::- create your Account

Username, Password, and Email:

The image shows the GitHub account creation form. At the top, it says "Join GitHub" and "Create your account". The form has four main input fields: "Username", "Email address", "Password", and "Verify your account". The "Password" field has a note below it: "Make sure it's at least 15 characters OR at least 8 characters including a number and a lowercase letter. Learn more." There is also a checkbox for "Email preferences" with the text "Send me occasional product updates, announcements, and offers." The form is styled with a dark background and white text.

Then verify the your email and click create account :

- **Select the occupation**

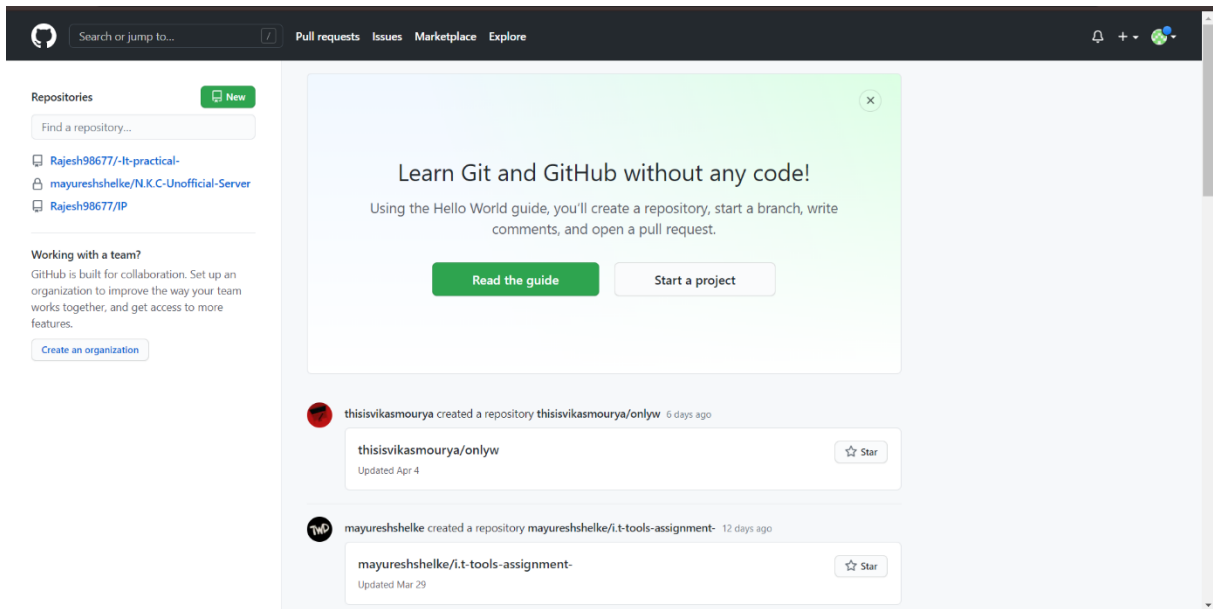

What kind of work do you do, mainly?

<b>Software Engineer</b> I write code	<b>Student</b> I go to school
<b>Product Manager</b> I write specs	<b>UX &amp; Design</b> I draw interfaces
<b>Data &amp; Analytics</b> I write queries	<b>Marketing &amp; Sales</b> I look at charts
<b>Teacher</b> I educate people	<b>Other</b> I do my own thing

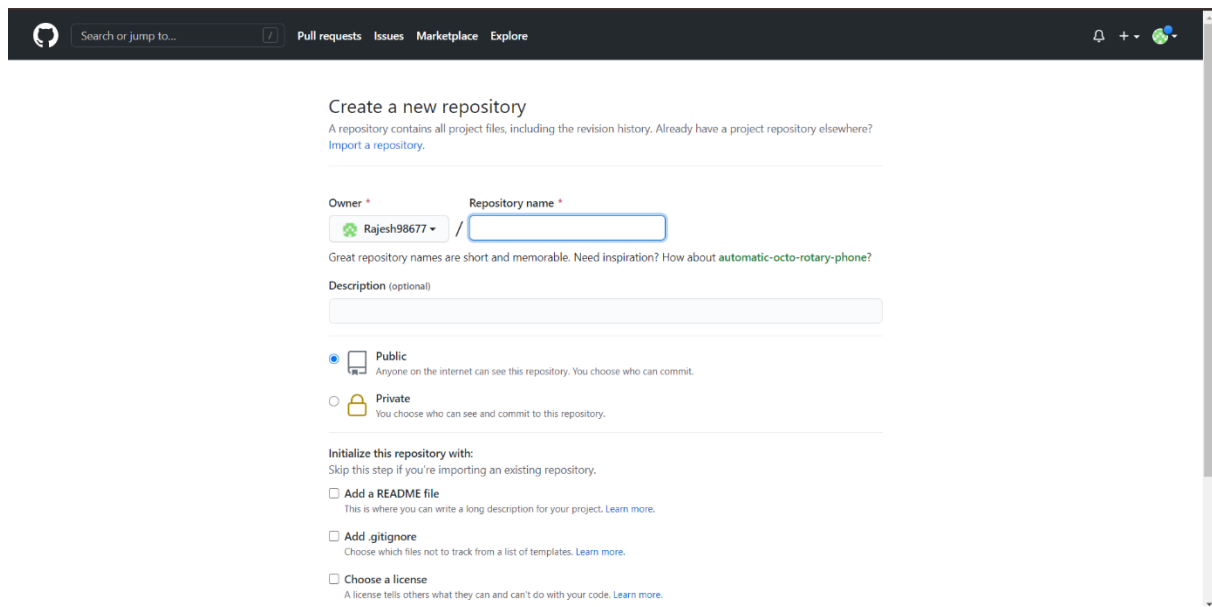

b)

**Creating Repository :**

**Click on + sign and click on New repository**

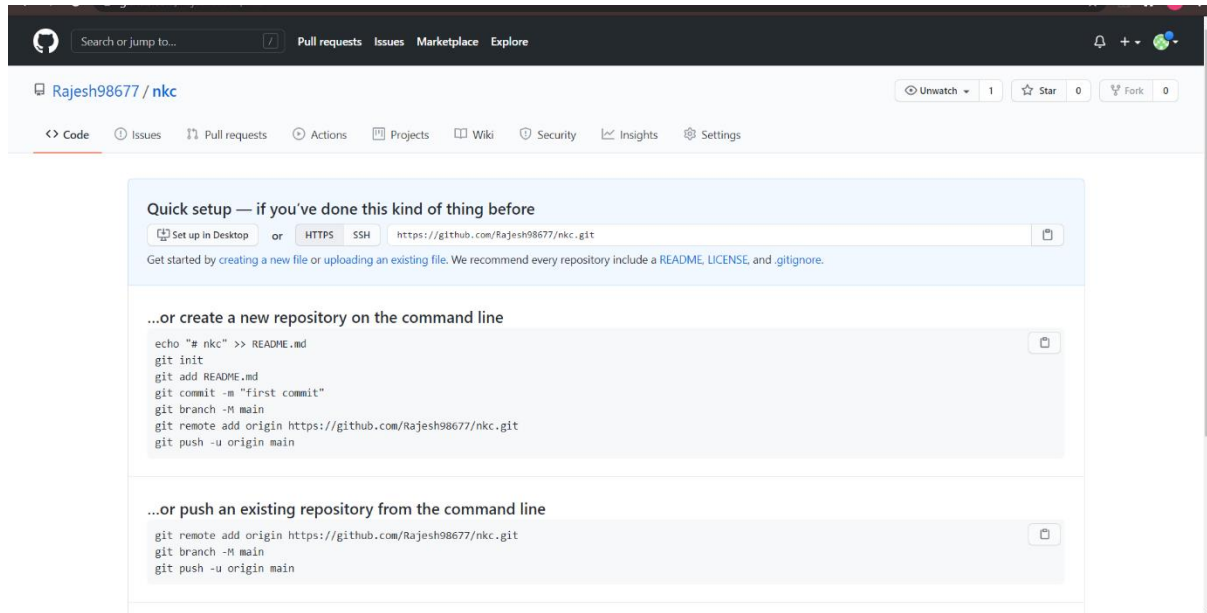

**Give Name to your repository and do the setting as per required**

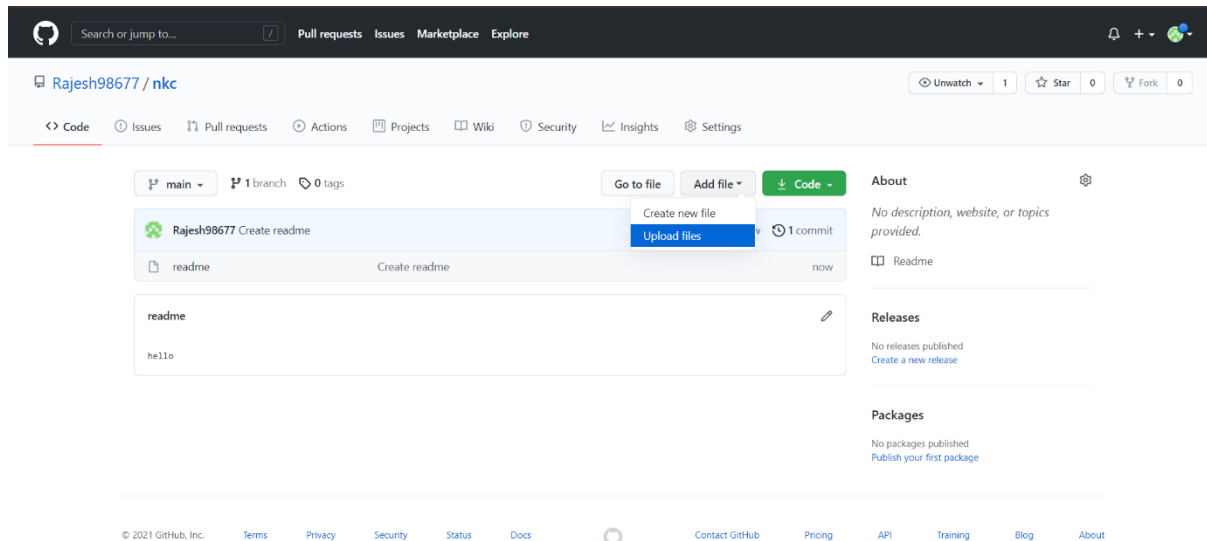

c)

**Cloning repository:**

**Click on Code in green highlight as shown in screen shot:**

**You can clone it with three steps as HTTPS or SSH or GitHub CLI:**
